

DX-Fusion - A Software Utility to transfer Tally data into your database

About DX-Fusion

DX-Fusion is a software utility that transfers data from Tally ERP 9 into your database. It supports MS-SQL Server, MS-Access, MySQL, Oracle and many other popular databases.

DX-Fusion works with **Tally ERP 9** Release 1.61 and higher versions. It can retrieve data from Tally in both online (real-time) and off-line modes.

For more information, please refer this link <http://www.rtslink.com/dx-fusion/>

PS:

DX-Fusion does NOT support UNICODE. Hence, if Unicode data is entered in Tally, the same shall NOT be displayed correctly in your database.
