Version: Developer Manual – Purchase to Purchase Order /1.0/October 2009

Purchase to Purchase Order

Scenario

A firm **Global Enterprises** using Tally.ERP 9 is making use of order processing. They enter narration only in Purchase and they need to append same narration for that Purchase Order.

Requirement Statement

User passes a Purchase and while passing Purchase in supplementary details Purchase Order would be selected. As soon as narration is entered narration for Purchase Order should be updated automatically.

Solution

In order to update narration automatically in Purchase Order, the following steps have to be adhered:

I. Changes in Invoice

- a. On acceptance of Purchase voucher, the value should be pushed to Purchase Order. Hence at form level we would make use of Event '**On: Form Accept**'.

```
[#FORM: Accounting Voucher]

ON : Form Accept : @@IsPurchase : FORM ACCEPT
ON : Form Accept : @@IsPurchase : SET : VarNarr : $Narration
ON : Form Accept : @@IsPurchase : CALL : Modify PO Narration
```

- b. We need to modify a voucher object value based on value from current object. Hence in the function we make use of Action 'Modify Object'.

```
[FUNCTION: Modify PO Narration]

01 : MODIFY OBJECT : (Voucher,@@VID).Narration : ##VarNarr
```

TDL Capabilities Used

- I. **On : Form Accept** event used at Form Level
- II. Use of action **Modify Object** in the Function
